We Believe in Sustainability.....

At Carroll Food Services, we always try to use locally-sourced and seasonal produce – it's better for taste, and better for the planet.

That's why, in addition to our standard quality systems, we're also committed to achieving and maintaining a carbon-neutral status and environmental standards accreditation.

We also go to great lengths to source our produce in an ethically responsible manner.

Our ethos is simple... our business is based on offering great tasty food at competitive costs, but it should also be sustainable, minimize our impact on the environment, supports our workforce and contributes to the health and well-being of our customers.

J. Kenneth G. Carroll MA, BSc (Mgmt.), FIHI
Managing Director
